The Corvallis City Legislative Committee supports HB 4083

The Corvallis City Legislative Committee, comprised of the Mayor and four city councilors, believes that this bill aligns with the carbon reduction goals of the City of Corvallis and would be a positive step in combatting climate. Where the state chooses to invest its dollars matters and speaks to our convictions as a society. It is critical that the state move away from investing in the fossil fuel market and towards greener, more future oriented industries.

Thank you for your time,

Gabe Shepherd
Corvallis City Councilor, Ward 4
