

Submitter: James Waddington

On Behalf Of:

Committee: House Committee On Rules

Measure: HJR201

This is just another layer of tax when people are already struggling with inflation and high prices everywhere. We don't need more government and taxation. I can't believe our elected leaders would even consider a measure like this, it shows how out of touch the government is with constituents. We already have laws on the books for safety, just enforce the laws.
