

Submitter: Thena Larteri Lyons

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1559

It doesn't matter what you change "global warming" to. You are using language corruption to suit your agenda. Since we have had snow, torrential rain and the glaciers are not melting fast enough, changing the language give you no better rights to enact emergency powers, simply by changing the verbiage to "climate change". It's idiotic because climate is always changing; that's not an emergency. It's nature!
