

Submitter: Aleta Rice  
On Behalf Of:  
Committee: House Committee On Rules  
Measure: HJR201

That's not a fair tax. There are thousands of people in Oregon who do not own land and would not be paying their share of that tax.

How about we bring back old time real forest management that clears the dead trees and brush from our lands and then when there is a fire jump on it right away instead of letting it burn for days so it gets big enough that the crooked politicians can get federal aid which they then put in their pockets.
