Committee: House Committee On Early Childhood and Human Services

Measure: HB4129

Hello,

I'm a disabled person with a PSW and I don't want another layer of bureaucracy in getting services I need. I don't want an agency of choice provider. I'm happy working with my brokerage and my PSW without having yet another party involved just to maintain the services I already get. This bill if it passes must be amended to make an agency of choice optional to the person receiving services and allow those of us who are happy with directing our own services independently with help from our brokerage to continue doing so. Honestly it feels like the state just keeps adding layers of complexity and changes every year for those who are disabled.
