

Submitter: Jack Turpen

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB1583

As a highschool student, books are often a main recourse for collecting information for projects or even just entertainment. I believe our society is built upon information which has traditionally been passed down through books. These books tell us about history and where we have come from as community and individuals. This information is important to make sure we dont repeat past wrongs and that we learn from our mistakes. A book ban would lead to important ideas or events being forgotten and poteintally repeated.
