

Submitter: Rosalie Smith
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB1583

You have lowered the standards for graduation, and now students are graduating that can't read, write, or do math. Now you want to remove the ability of school boards to design the curriculum for their communities while you want to indoctrinate our children with DEI, a gross Sexual education that encourages children to change their sex, which is not possible, anti Christian ideals, hatred for our country, radical Marxism with the BLM agenda, and a racist agenda of oppression/victim hood.

Let the education go back to the local communities where the local people have a say in the curriculum and where parents can get their rights are respected. You wonder why parents are opting out of government run schools for home schooling, private schools, and other alternatives. If the schools are crying about inadequate funding, they have no one to blame except themselves for the above reasons.

I am a retired teacher, and there is no way on God's green earth, I would allow my children to go to most of the schools, especially Salem. My grandchildren have all taken alternative routes to get fantastic educations. R Smith
