

Submitter: Loren Miller

On Behalf
Of:

Committee: Senate Committee On Veterans, Emergency Management, Federal
and World Affairs

Measure: SB1548

While we enjoy the extra daylight in the evenings, it does not come close to making up for late sunrise. We always get the same amount of daylight hours no matter what the clock says. Year round Daylight time would have a 9 am sunrise on the shortest days. We have put up with these semi-annual time changes for far too long. Let common sense prevail. PLEASE DROP any efforts for year round Daylight savings time. Pass this bill so we can live a normal life again.
