

Submitter: Wanda Magdalen

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB1583

As a grandmother, I do not want my grandchildren to be taught in school anything other than the basic educational materials that will help them throughout life.....reading, writing, math, history, science, gym and sport classes! We do not want the children being taught that they can change their God Given Gender or Sexuality classes that are for parents to teach and answer their questions! We expect the teachers, who are paid by the taxpayers, to teach school subjects that will prepare them for further education and vocations that will help them to succeed in their careers!

Leave everything else to the parents!
