

Submitter: Dorian Buttacavoli
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB1583

I oppose this bill because it would take the rights away from local parents and school boards to control the amount of related materials that their children will be receiving. If the government were providing materials that could be taken or rejected by choice by the local community that would be different, but to impose mandates to use this material in the local community is wrong. Make it available, but don't demand that it be used.
