

Submitter: Susan Crabb
On Behalf Of: Our children
Committee: Senate Committee On Education
Measure: SB1583

To all whom is considering such a bill your beliefs and integrity of your values are instilled through proper morality of covering your children and youth not exposing them to every sexual activity or behavior that brings confusion. Let them be children not your experiment. They already accept everyone it is naturally in them and to say your different because of the way you think or feel only causes more separation and division. Leave our kids alone!
