

Submitter: WANDA WALKER

On Behalf
Of:

Committee: Senate Committee On Veterans, Emergency Management, Federal
and World Affairs

Measure: SB1548

I am an amateur astronomer, or simply a sky watcher. I strongly support year-long standard time. I disagree with daylight savings in concept: if schools/businesses/etc. want to have more daylight after school or work, then they can change their hours for a few months. When I am assessing the shade needed for an outdoor music performance, I want solar noon to be close to 12:00 (I am aware it strays from this exact time); I don't want to have to think about whether it's now DST and adjust by an hour.
