

Submitter: Nikki Hoffman
On Behalf Of: All school children in the State of Oregon
Committee: Senate Committee On Education
Measure: SB1583

I oppose bill SB1583. The proponents of this bill intend on pushing their progressive ,ideologically driven anti science agendas on Oregon's students and it does not belong in the textbooks. . This is not not right whatsoever as parents have the right to direct how their kids are raised as well as the right to know directly how their schools are being run. Kids are getting pulled out of schools by the thousands and this bill will only make it worse. There is no need for LGBTG agendas to be pushed on to kids in the first place. Of course the ones pushing this nonsense think they know better. This bill is just a way for the state to be in control of the parents and school boards. Who by the way in case you forgot the school board members are elected by the people in the community. This would just be a way for the state to push the political party of the current Governors office and Legislation. I urge an absolute No on SB1583, Schools are for education, reading, writing, and math and not learning about gender identity or any other of the LGBTQ propaganda. You need to leave the kids alone, its no wonder society today is like it is. These kids running around, causing crimes ,doing drug,, selling drugs, shooting people in their gangs and wrecking havoc on the streets every where. It has to stop now or what will their future be like. They already are confused. The parents rights don't need their rights stomped on with this ridiculous bill. As well as the kids who have rights, deserve to get an education without all this pushed upon them. The state has no right to even push any of this in the schools period.

I urge you to vote No on this ridiculous bill SB1583.

Thank you
Nikki Hoffman
