

Submitter: Amanda Page
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB1583

No individual, organization, or school board should be able to prevent children from accessing books that represent protected classes. Discrimination has no place in our schools. Groups that look to ban books based on discrimination are looking to erase the presence of entire groups of people. This is in direct opposition to the common belief and principle that all people are created equal. If all people are created equal, they deserve equal representation.
