

Submitter: Sharon Doud

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB1583

It is a travesty to think that the State believes it should have more right to control what school children are taught than the children's own parents/guardians or the school district in which they live. Please vote NO on SB1583. This is The United States of America, not Communist China or a similar country where government crushes the rights of the people they govern.
