

Submitter: Erica Chaney
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB1583

To whom it may concern,

SB 1583 is important.

One of the benefits of the group educational setting is to interact with others and have social experiences with others who may not be exactly like oneself, but even these interactions have limits. Our modern society is diverse and transient and very interconnected. Students should have experience with the lives, experiences, and histories of others through instructional materials. This will enable them to not only understand other individuals they may encounter once they leave school but also better understand themselves.

I support SB 1583.

Thank you for your time
Erica Chaney
