

Submitter: Trevor Hoagland
On Behalf Of: Parents
Committee: Senate Committee On Education
Measure: SB1583

I'll keep this short, but the power of the people is supposed to be local. Stripping the parents and school boards of the rights to their establishment really curtails parents virws being respected and erodes the trust in the failing school system and the failing state further. Especially when it seems that the State is using sidesteps to enforce things that not all parents agree with.

So, I oppose this as it is In-American.

I oppose this as it is authoritarian.

I oppose this as it is tyranny in education which will lead to tyranny in the future of Oregon's children.

This is laughable that we are fighting for the bottom of the barrel in education. Oregon is the laughing stock already as we have NO graduation competency requirements. If we have no standards then why are we funding something that doesn't work for the community?

You have stripped parents rights to information, schools have hobbled awareness or consent in education, you have stripped the demand that education be exemplary in the name of equity, which lowers both the standard, quality, and possible metrics of success. Beavertons school district is hilarious as their grading system is just prep work for job annual reviews down to the same language.

These children's are not employees, yet, but we are not even arming them to be good employees as nothing matters, no discipline is enforced, and no merit is required. Just age in the system like prisons it seems in this state.

Give our children a better chance. Let our parents help decide, and push for transparency in education not obfuscation "because we told you so."

Otherwise deaf and fume we will see Oregonians of the future lead to the slaughter. Please realize why things like greater Idaho is seeing such a success.

Make Oregon a population growth and a shining beacon. We know Portland is no longer the city of roses but homeless, drug use, and rampant taxation and whipping of the middle class. Your abuse of measure 113 is abhorrent and the idea unconstitutional due to the rules of the legislature.

Ram this through and it's another straw breaking on the camels back with all the

other excessive spending, bad budgeting, and overwhelming taxation.

No one wants bad education for the children. That is the unifying thought in this state. If public schools worked then private schools, charter schools, and homeschooling options would not be on fire for the state.
