

Submitter: Leland Richey  
On Behalf Of:  
Committee: House Committee On Education  
Measure: HB4161

I support HB4161. Our Children and Grandchildren need to have the freedom to choose which school and method of education they wish to receive. The current indoctrination method of many of our educators might be fine if we wish to have a future workforce of "puppets". But what made this country great in the past was a group of free thinkers who believed that "We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness." Please support HB4161 with me.

Thank You  
Lee Richey
