

Submitter: Calais Wlasiuk
On Behalf Of:
Committee: House Committee On Rules
Measure: HJR201

To Whom it May Concern,

I would like to kindly request that you oppose this measure. As a law abiding , tax paying Oregonian this would increase taxes , even if it is a slow increase, which is something I strongly oppose. I believe in being responsible with what you are given and through the years I have seen much waste when it comes to spending, not just in Oregon but nationwide. We are currently living in an economy where prices of groceries, heat, water and other daily necessities have increased. This needs to stop. Please work with what you currently have and please do not continue to raise taxes to put a bandaid on a problem that could potentially be fixed in another way. There are more options than to simply continue to raise taxes and burden the everyday local owner and tax paying citizens. Thank you for taking the time to read this.
