

Submitter: Sonja Brandjes

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB1583

Censorship is the first step in shaping a nation filled with people who have a narrow view. It weakens us as a whole by diminishing diversity and thusly our resilience. Our best ideas as people, groups, communities and ultimately society arise when all voices can be heard, analyzed and acted upon. Unbiased and uncensored learning opportunities and resources are the building blocks to the informed critical analysis skills needed to enable each person to use their agency for self improvement and the improvement of our communities.
