

Submitter: Jaylyn Nunn

On Behalf  
Of:

Committee: Senate Committee On Veterans, Emergency Management, Federal  
and World Affairs

Measure: SB1548

I would rather have year round daylight savings time. I do not want year round standard daylight time. I do not want more light in the morning. I want more light in the evening.

Switching to year round daylight savings time would allow me to come home from work with some daylight in the evenings during the winter. Play with the kids when there is still light. Kids can come home from school in the light, rather than the dimming light. Especially those who participate in an after school program.

Daylight savings time makes summer sun and winter sun enrich our lives in a state that already struggles from sadness and depression in connection to so few days of full sun.

Say "no" to standard time, say "yes" to daylight savings time!
