

Submitter: Ethan Heins  
On Behalf Of:  
Committee: House Committee On Rules  
Measure: HJR201

The tax percentage in this state is only subdued by the increase rate cap per year. If that is eliminated in any way it would lead to people having to spend atleast half of their income to their home. Mine would go from \$5,000 to upwards of \$13,000 per year. This would make taxation on my property higher than the rental of a low income apartment. Then adding a mortgage and utilities. This on the heels of the inflation we have been seeing would destroy a staggering amount of people's lives. And the rushed nature of this hearing is disgusting that you would not give due notice for people to attend. I find this disrespectful and immoral. I am in strong opposition of this.
