

As a father in Oregon I am deeply concerned for the future of my children. Up for discussion this week and to be voted on soon is Senate Bill 1583 which will to introduce sexually inappropriate materials into our children's school libraries and classroom curriculum under the guise of an emergency order against discrimination effective as soon as the bill passes. This bill will supersede the authority of local school districts and force them to implement these materials over and against parent and school official wishes for how our children are educated in the public school system. If you have any inkling of protecting and preserving the innocence of your children please be outspoken in opposition to this bill.
