and World Affairs

Measure: SB1577

The main benefit of being a US citizen is to be able to choose our government. (legal voting). this is not a vague debatable idea. The privilege to so depends on the citizenship test. To automatically register people who are merely applying to Oregon colleges to vote seems to be some ploy for votes and potential revenue. If students are already US citizens they are most likely registered to vote in their home states. if they are NOT US citizens then allowing them get in line to vote through automatic registration is not even legal. The bill prohibits the transfer of any records demonstrating that a person is not a citizen of the United States even though Section 2 requires citizenship information. Why?? This is a BAD BAD bill and makes a mockery of not only our US constitution but you are spitting in the faces of those of us who are Oregonians and your constituents. Please protect the integrity of voting in our state. This does not do that but only opens it to such massive fraud. Trying to understand the reasoning.....and can only come up with the drive for control and power.
