

Yes on House Bill 4112

Support for Investment in Oregon Clean Technology Leadership

The Sheet Metal and Air Conditioning Contractors Association of Oregon and Southwest Washington (SMACNA) **supports House Bill 4112** and urges the support of the House Committee on Climate, Energy and Environment.

Our trade association represents large and small contractors in the HVAC, metals fabrication and architectural metals industry and our members firmly believe that Oregon has the potential to become a leader in clean technology manufacturing.

Our member companies and our highly skilled workforce have and continue to manufacture, install and service clean technology equipment and components across the state and region. Leveraging federal funding to create a larger, stronger, and wider base of clean technology industry in Oregon will greatly help the economy, tax base and further development and expansion of our workforce.

SMACNA Urges Passage and Funding of HB 4112 !
