

Submitter: Kevin Gee

On Behalf  
Of: Taxpayers

Committee: Senate Committee On Veterans, Emergency Management, Federal  
and World Affairs

Measure: SB1567

In re: the Walla Walla Water 2050 Strategic Plan, human existence in the 21st Century requires abundant electricity (ask any Tesla owner); hydro-electric generation from dams is the greenest method of producing that asset. Those of us concerned with saving the fish can support the investment of rushing them up and over dam heads with a Whoosh Salmon Cannon device:

<https://www.youtube.com/watch?v=2KTNTTbafg0> <= For the sake of all that's great while living in the Pacific Northwest, all Snake & Columbia River dams must remain and maintained in place ad infinitum. It's an established scientific fact that fish and humans CAN coexist! Please vote 'No' on SB 1567 and oppose all dam-removal considerations in any other proposed legislation.
