

Submitter: Andrew Briscoe

On Behalf
Of:

Committee: Senate Committee On Veterans, Emergency Management, Federal
and World Affairs

Measure: SB1548

Please end the madness. Whatever arguments people originally had for creating daylight savings time have all been thoroughly debunked, and now we are massively inconveniencing everyone (and even endangering their lives) twice a year for no reason other than pure cultural momentum. What chance do we have to tackle important systemic problems like climate change, if we can't even eliminate this, the smallest and most obvious obstacle that we are repeatedly walking straight into again and again?
