

Submitter: Lori Spencer

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB1583

I oppose this measure for two reasons. First, this matter of selecting instructional material for schools is hardly an emergency, and does not require immediate action upon passage. Second, in reading the impetus for this bill, it appears to be an attempt to combat the desire of parents to protect their children from sexually explicit material. The fact that the legislature seems recklessly determined to ensure that children ARE exposed to sexually explicit material and alternative lifestyles is very concerning. Why is the state so resolute in exposing children to sexual content? It is disgusting and seems to be a further attempt to usurp parental rights.
