

Submitter: Buffy Miller

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB1583

The bill will prohibit school boards from choosing or restricting materials. In doing that, we will be helpless to protect our children from materials that could harm them or provide materials that would be better than what the state would provide. I don't believe the "state" should have the ultimate decision in what our schools can or cannot teach. The reason we have local governments is because they know what is best for the local community. The local community, parents, and school boards should have authority over school curriculum.
