

David Lewin testimony to oppose HB4075

I want to express my opposition to HB4075 as I am against further bureaucracy being created which will no doubt exert power OVER the people rather than work WITH the people. I ask that you the government, whose purpose it is to represent the people, work within the confines of the budget already established. I also oppose the association with HJR201 that would amend the constitution to create a statewide property tax. My family isn't interested on a new amendment or tax, therefore I don't want a task force on how to spend the potential tax revenue.
