

Submitter: annie capestany

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: SB1572

I don't have a car. And i love the train! Please support this bill and any measure that improves public transit options for all people. Trains (and buses ) are a great strategy for reducing climate change impacts and cleaning our air. But we need efficient, frequent, easily accessible trains. Extending WES will make taking the train easier for a lot of people and get cars off the roads.

Vote yes on 1572!
