

Submitter: Ralph Cohen  
On Behalf Of: Professional Engineers of Oregon  
Committee: Senate Committee On Energy and Environment  
Measure: SB1559

Our position is "Support with Concern":

While PEO has supported the state's previous greenhouse gas emissions reduction goals, based on progress to date, is it realistic or necessary at this time to add an aspirational goal of "net negative emissions aspirational goal after 2050"?
