Construction

Measure: HB5201

I am submitting testimony because I feel that this project is an extremely important one for economy and culture of Oregon. Having lived in this amazing state for over a decade, I can say with full confidence that this Hillsboro Hops project will greatly benefit a state ready and wanting to bring their passion and energy to a professional baseball arena. I have seen on countless occasions the strong connection that sports can bring to a community, specifically this community. And I firmly believe adding a world-class baseball stage to Oregon will benefit our economy and our community.
