

Submitter: Thomas Wrisley  
On Behalf Of:  
Committee: Senate Committee On Education  
Measure: SB1583

Senators,

The inherent dignity of marginalized people is called into question regularly and people's very identities (and existence) is targeted for erasure. This legislation is important to prevent these identities from being erased in public spaces and thus I urge your support for this bill to protect people's right to simply exist and be represented in public spaces.

We live in a rich and a diverse society and everyone deserves to know that they belong, and everyone deserves to know that there are people put there that share their experiences.

Thank you, please vote yes to prevent discrimination in selecting reading material.
