

Submitter: Janice DYSINGER
On Behalf Of:
Committee: Senate Committee On Rules
Measure: SB1538

We oppose the bill specifically Section 3, 2nd paragraph lines 26-29. We need to test the system.

Why remove the language of the public certification test and those observing it prior to the commencement of the count?

This change is repeated in the -2 Amendment in a couple of places.

I went through the RFP? New election contract for ORVIS and the Gartner evaluation that stated the system was not qualified to meet the standards to be used for the 2024 election. So they are using a "Minimal Viable Product" but we don't know what that means. I will submit those documents. But they will be separate submissions to testimony as I can only attach one document at a time.
