

Submitter: F Hoskins
On Behalf Of:
Committee: House Committee On Rules
Measure: HJR201

All taxes are repulsive to the constitution of the United States Republic. Be advised by creating additional tax burdens on an already over taxed people currently enslaved by British Crown Bar law you would be committing treason against the Republic and its people.

The people have the authority to remove every treasonous politician for crimes against humanity by their actions against us. That included the imprisonment in our homes, barring our right to travel and attend to dying family members in hospitals or to practice religious freedoms. The poisoning of the populations water supply with fluoride on top of DNA altering vaccines currently sterilizing our next generation is egregious and will no longer be accepted.

You have been given notice by we the people.

Military is in Control...
