Committee: House Committee On Agriculture, Land Use, Natural Resources, and
Water

Measure: HB4106

Please oppose HB4106; it is a terrible bill for our forests, wildlife, climate, etc. I cannot believe that I am having to write comments such as this again. It should be obvious to any rational individual that our forests are much more valuable left alone than being harvested for short term profit. Climate change is a fact and our forests if left alone will do their job to help protect our planet which we humans are destroying at an alarming rate. Thank you for your consideration.
