

Submitter: Claudia Roberts

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: HB4083

The Global efforts to decrease carbon emissions is falling short of the necessary goal to maintain a Livable climate for all people on earth. This bill makes a minimal attempt to ask Oregonian companies to divest of coal holdings. But it is a step in the right direction and ask that all members of the join with Senate and House the sponsors of HB4083 to pass this bill during this session.
