

Submitter: Robert Taylor
On Behalf Of:
Committee: Senate Committee On Rules
Measure: SB1548

Senators,

Permanent standard time would be a huge hit on the majority of Oregonian's mental health. Every year I and countless others experience a life-altering event when, like a gift from Helios himself, we are blessed with an extra hour of sunlight post-work on March 10th. I can't overstate how devastating it would be to have the Oregon congress rip this away from me.

Please consider the age discrepancies of those who submit testimony. I'd imagine the majority of people submitting testimony to congress, like those who vote, are retired boomers. Unlike retirees, my schedule is stuck in an 8-5 paradigm. Extra sunlight pre-work is far less useful than having sunlight after work. The recreation industry would no-doubt agree. I urge you all to spike this proposal and instead support permanent DST.

Respectfully,
Rob Taylor
