

Submitter: Joshua Tulberg  
On Behalf Of:  
Committee: Senate Committee On Rules  
Measure: SB1548

This should be (and has been) put to a public vote, on a ballot.  
Not voted on by a committee.

The general public is overwhelmingly in favor of permanent Daylight Saving Time, but the much louder minority (who has the free time to lobby and fill out these testimony forms) is in favor of the opposite.

I want more sun after work.  
I want permanent Daylight Saving Time.

Unspoken Financial Impact:  
There will be less remote jobs going to Oregon if this passes, because there will be less companies (especially those on the east-coast) willing to put up with Oregon being an additional hour behind for 8 months out of the year.
