

Submitter: George Burwood

On Behalf Of:

Committee: Senate Committee On Rules

Measure: SB1548

A preponderance of evidence supports shifting permanently to DST over standard time. Light evenings have more significant economic and social benefits to light mornings.

From a personal perspective, I routinely wake up and go to work before it is light and leave when it is dark. I can handle the mornings - it is after all getting lighter. What I loathe is missing the chance of having light outside after I work.
