

Submitter: Mary Dickson Pegan

On Behalf Of:

Committee: Senate Committee On Rules

Measure: SB1548

Please do not do this measure. We like having long summer evenings, which is great for business and after work outdoors activities which makes our state great. Also, this will be really bad for business, especially at national companies like Nike and Intel which have to coordinate meetings with stakeholders all over the US. We would be out of synch and further behind Eastern and Central time zones most of the year.
