

Submitter: Kelly Lambert

On Behalf Of:

Committee: Senate Committee On Rules

Measure: SB1548

We have all read and heard reports of the benefits to our health for maintaining “standard” time as well as other aspects such as, better productivity in business to safety for our children, that have all been looked at throughout this ongoing discussion. Saying this one needs to wonder why would this even be an issue up for debate. My overall belief however is that God created this earth and all that it contains, He set the time for the sun to rise and to set, the “standard” by which we began and by which we should maintain. Man has done enough damage by trying to change what God has set in place, let’s start bringing our all mighty God back into play, as He ultimately rules the earth and all it contains.

I support and ask that whatever needs to be done to keep “standard” time as our standard time be supported and passed. Let daylight savings time fall away into the history books.

Thank you and God bless!
