

Submitter: Raymond Hardiman
On Behalf Of:
Committee: Senate Committee On Rules
Measure: SB1548

I am writing to support the removal of changing time twice during the year twice. I feel it is unnecessary and can cause problems such as missing appointments if the date of time change is not remembered until after it happens, I don't see any benefit to changing the time in the fall and again in the spring, it makes no sense. All states should just stay in their time zones all year long. If enough states follow this approach we can all just stay on the same standard time within each time zone. I don't think we should be ruled by neighboring states, if we go this way the other states will be motivated to follow. Lets lead the way on this issue.
