

Submitter: Neil Maus

On Behalf Of:

Committee: Senate Committee On Health Care

Measure: HB4130

I work in an ER run by a corporate group. There is an abnormal money focus and billing focus. We are told to keep patients happy at all costs instead of doing the right thing. Often, we try to encourage pts to get their flu and COVID vaccines, and they tell us not to talk about it, as it takes too long and makes patients frustrated. Doctor clinical care has become all about feeding the corporate machine and churning patients through our ER as fast as possible instead of doing the right thing to provide comprehensive, compassionate care. Please ban corporate medicine to let doctors and non profits run practices and ERs. My dermatologist sold his practice to private equity and says they now have quotas for how many biopsies they need to do to make their numbers and bonus structure. Please return medicine to doctors to just do the right thing and take good care of patients. Thanks for your time.s
