

Submitter: Irisa Devine
On Behalf Of:
Committee: Senate Committee On Health Care
Measure: HB4130

Dear Senators,

I am a Pediatric Neurology physician writing in strong support of HB4130, a bill that would stop corporations from practicing medicine. Corporate medicine will literally be the death of all of us. In my experience, when corporations are determining what tests physicians can run, who is hired or fired based on production (quantity) and not quality care, when our medical licenses are used without our knowledge, all of this is the perfect recipe for medical error after medical error, and extremely poor patient care. We all vowed when we graduated from medical school "first, do no harm". This is impossible to uphold when decisions are being taken from our hands due to corporate greed. Please make the right decision for all of us who have dedicated our lives to help patients, not for those who are just interested in turning a profit. Please also keep in mind your own healthcare and that of your family's as you help guide the future of medicine. Thank you for your time.

Sincerely,
Irisa Devine, MD
