

Submitter: Timothy Arleo
On Behalf Of:
Committee: Senate Committee On Health Care
Measure: HB4130

Dear Senators,

I am a diagnostic radiology resident physician writing in strong support of HB4130, a bill that would stop corporations from practicing medicine.

Lay-corporations lack the necessary expertise and ethical considerations essential for providing quality healthcare. Their profit-driven motives often prioritize financial gains over patient well-being, leading to compromised standards of care and unnecessary procedures solely aimed at maximizing revenue.

In my experience, I've witnessed firsthand the detrimental effects of allowing lay-corporations to practice medicine. Patients are subjected to unnecessary treatments, diagnostic tests, and medications, all driven by corporate interests rather than medical necessity. This not only escalates healthcare costs but also endangers patient safety by diverting attention away from evidence-based practices and holistic patient care. It's imperative to enact legislation that safeguards the integrity of the medical profession, prioritizing patient outcomes over corporate profits.

Sincerely,
Timothy Arleo, MD
