

Submitter: Leonard Morneau  
On Behalf Of:  
Committee: Senate Committee On Health Care  
Measure: HB4130

Corporations are destroying the American healthcare system. All these companies do is come and buy up a practice, cut staffing and then take large profits for doing no work. Meanwhile the people actually caring for patients are over-worked, underpaid and want to leave. With the system already being understaffed this exacerbates an already overstressed healthcare system. The corporate practice of medicine has led to worse care and outcomes for patients. They care nothing about the health and well being of patients and care solely about profits. They are a poison to the healthcare system and must be eradicated.

These corporations also have a history of trying to replace physicians with PAs (physician assistants) and NPs (Nurse practitioners) which leads to over utilization of resources. It is not the fault of the PAs and NPs, they simply don't have the training of a doctor. They will typically have maybe around 500-1000 hours of training (which depending where the training was done may not have even been real clinical experience) whereas physicians on average have 15,000+ hrs of training. There is simply no comparison. But the corporations do not care about this at all and will replace doctors with PAs and NPs because they can pay them less. Because they (PAs/NPs) don't have the same training they tend to order more testing/studies which raises costs and increases the utilization of resources on an already stressed system.

By passing this Bill, Oregon is taking a big step in repairing the completely broken healthcare system operating in this country.
