

Submitter: Renee Nilan

On Behalf Of:

Committee: Senate Committee On Health Care

Measure: HB4130

The issue with the corporate practice of medicine is the practice of putting profits over quality of care. There are a number of ways this occurs, from purchasing equipment that is not effective for patient care, or not supplying it at all. Physician productivity has been being pushed above levels that are safe for patient care. I'm sure you can imagine that seeing 4-6 patients per hour in an emergency department is unrealistic if any quality of care is expected. That is 15 minutes or less to listen to the patient complaint, place orders, dictate a chart and determine treatment. Would you like an explanation of what's being done to you?? Sorry. Out of time.
