

Submitter: Sh Osten MD
On Behalf Of: PHYSICIAN AND PATIENTS
Committee: Senate Committee On Health Care
Measure: HB4113

It's a sad state of affairs when not using insurance gives a better price for medications than using highly priced ridiculous costing health insurance

I support bill regarding all costs be included for meds, deductibles and patient costs. Physicians are forced to practice inappropriately when patients cannot afford the medication and tests that are recommended. many many patients cannot afford the coinsurance involved for basic testing This has been worsening EVERY year and is dangerous for a physicians ability to practice good medicine and a patient's ability to afford the advice of their expert physicians recommendations.

Thank you!

A concerned, patient, physician, MD, and REAL doctor
